

# Is Your Outdated & Frustratingly Slow Technology KILLING Your Business?

## See How Technology Impacts Your Entire Organization

### Bottom Line

A 2016 study showed that U.S. businesses lose up to \$1.8 billion every year in wasted productivity due to slow technology. That's an average of 40 minutes per day!

### Hiring & Staff Retention

Workplace technology influences job decisions for 80% of millennials and 42% would even leave a job due to bad technology

### IT Support

Internal IT departments are so overwhelmed with work that 1 in 5 employees say they cannot help with most technical issues

### Client Retention

90% of businesses would consider taking their business somewhere else due to concerns about security and privacy when dealing with a company using outdated technology

### Sales & Reputation

57% of people think small businesses are more competitive in the marketplace when they use modern technology
