BUSINESS INFORMATION SOLUTIONS ANNOUNCES LAUNCH OF NEW MANAGED IT PLAN DESIGNED FOR GULF COAST ORGANIZATIONS

Robertsdale, AL (January 6, 2022) – Business Information Solutions, Inc. (BIS), the leading technology and cybersecurity firm on the Gulf Coast, launches BIS Essentials, a managed IT support service designed for small businesses that need just the essential components of a successful technology strategy.

The core of any IT management plan is asset management, data loss prevention, patching and endpoint detection and response. With BIS Essentials, businesses receive all the above while experiencing less downtime with 24/7/365 monitoring by a local, in-house tech team.

"After servicing this market for the last twenty years," said Phillip Long, CEO of BIS. "I found that some businesses don't require as much ongoing support and security as others but need the cybersecurity protection. So, I wanted to offer a custom package for any size organization that provides the right amount of coverage at the right cost."
